Role: Developer.

### • [Netflix clone](#), [Link](#)

[React JS, Tailwind CSS, Firebase, TMDB API, React Router, Axios]

In this project I build a front-end Netflix clone with a Firebase back-end! The website is able to store user specific data with a React front-end and a Firebase back-end. I use Firestore which is cloud storage to save data. The front-end is styled with Tailwind CSS. Also it was deployed with Firebase Hosting. The website is designed to be fully responsive, adapting to different screen sizes starting from a minimum width of 375px.

Role: Developer.

### • [Filmoteka](#), [Link](#)

[HTML, SASS, JS, REST API, AJAX, Parcel]

A web application to show the popular movies of the week, search for a specific film, and organize the user's library to manage movie lists. Project features: Unique design, API with millions of movies, Mobile and tablet version, Popups and notifications, Fast and easy to use.

Role: Developer.
